Welcome to Clever Life!

Our Story

Welcome to Clever Life, where your home's intelligence is our passion. Nestled in the heart of Queensland, Australia, we're not just a brand, we're a family. Our journey began 15 years ago when Ben Casley, our founder, with extensive experience in high voltage automation and control systems, envisioned transforming the domestic housing industry with advanced technology. Today, Clever Life stands proudly as a leading Australian-owned SMART Home Automation brand, rapidly growing to meet your evolving needs.

Our Values

At Clever Life, we are committed to fostering a positive, reliable, and trustworthy relationship with you through every interaction. Your satisfaction drives us, and we're dedicated to ensuring that every Clever Life experience leaves you feeling valued and understood. Our products and services are shaped by your feedback and needs. We don't just build for you, we build with you. This collaborative spirit is the cornerstone of Clever Life, where every product reflects the desires and requirements of our extended family – you.

Why Clever Life?

When you choose Clever Life, you're choosing a partner in home automation who prioritises quality, service, design, and development. Our knowledge and range of Home Automation & Control products, all manageable through one dedicated app, represents our commitment to providing comprehensive solutions for your home.

We understand the importance of a product that not only performs exceptionally but also withstands the test of time. That's why we focus on continuous innovation and development, keeping pace with the ever-evolving world of technology. Our goal is to ensure that your Clever Life device is not just a gadget, but a lasting part of your home, enhancing your daily living and meeting your unique needs.

Join us on this journey of innovation and excellence. Together, let's make every home a Clever Life home.

STITCHY joins the Clever Life Family!

Clever Life is excited to announce the recent acquisition of the innovative 'Stitchy' product from Melec, a significant expansion of our smart home ecosystem. This acquisition not only broadens our diverse range of smart home solutions but also promises to enhance user experience by integrating Stitchy's user-friendly features with Clever Life's comprehensive product catalog. We're committed to providing our customers with a more connected, efficient, and intuitive smart home environment. Discover more about this exciting development and explore our expanded offerings here or visit www.cleverlife.com.au/stitchy.

Our Certifications

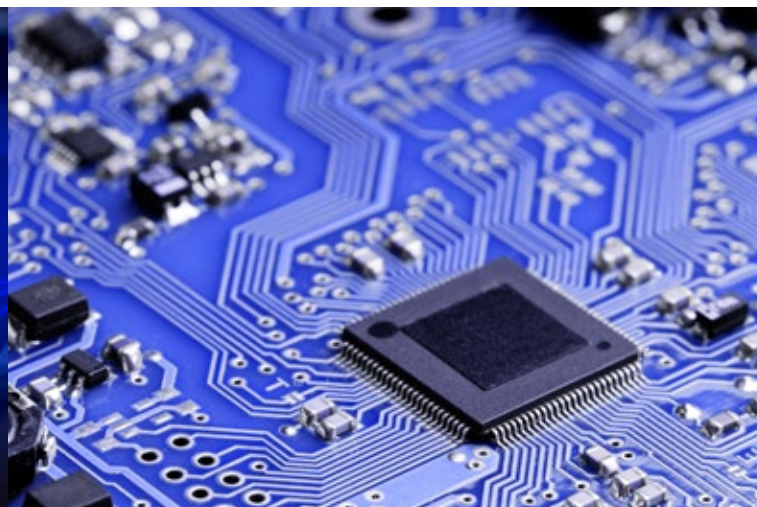

RCM : AS/NZS Electrical & Communication Standards Compliance

CE : EU Health, Safety & Environmental Compliance Standards

RoHS : EU Restriction of Hazardous Substance Compliance

WHO WE ARE

DC Ceiling Fans

MODEL No F0D5412-2

MODEL No F0D5413-2

What do you want out of your Ceiling Fan?

When considering what you might want from your ceiling fan, you should expect a harmonious blend of efficiency, innovation, and comfort. You would want a fan that moves air effectively and quietly, like our smart DC ceiling fan with its engineered blade design and ABS construction. It should be energy-efficient, reducing power consumption without sacrificing performance, thanks to its efficient DC motor. Durability and ease of use are also essential, with features like IP-rated construction and stainless steel bearings ensuring longevity and hassle-free operation.

Moreover, the convenience of smart home integration is crucial. A fan that offers remote app control, hands-free operation, and reactive temperature and humidity adjustments, aligns with modern lifestyles, ensuring your environment is always comfortable and controlled. Additionally, the reassurance of a 5-year warranty and the backing of a family-owned Australian business adds an extra layer of trust and reliability. In summary, you would want a ceiling fan that is not just a cooling device, but a sophisticated, energy-efficient, and smart addition to your home.

**Coming to Market
MID-2024!**

Clever Life will be the **FIRST** Manufacturer in Australia to release a **Rotary Wall Control Mech** for DC Fans! Our new controller will be a direct replacement for the traditional 4 position rotary control mech, and will provide On/Off and 6 speed controls for DC fans. This revolutionary product will be the first of its kind to market and will change the way we interact with DC Fans. To find out more or enquire please contact us.
